PRESURGICAL BLOODWORK

As part of our commitment to the well being of your pet, in providing the safest care, we recommend a pre-anesthetic blood screening. This is to ensure that the risk of the anesthesia is a minimum, by ruling out pre-existing internal problems (especially liver and kidney problems) that may not be physically evident but could possibly lead to complications. Other risks include cardiovascular collapse and respiratory failure.

Pets Name and Date_____

Clients Name and Contact Number_____

This blood screen is the same as those performed by your own physician prior to undergoing anesthesia. The results will also serve as a reference for future use, should your pet become ill.

Healthy patients under 5 years of age: PAP- Cost $64
This test includes: Bun, Creatinine, Alt, AlkP, Glucose and Total Protein
(Liver, Kidneys, Sugar and Hydration)

Sick or Elderly Patients over 5 years of age: SMA- Cost $87
This test includes all of the above listed, as well as:
Albumin, Phosphorous, Total Bilirubin, Amylase, Calcium, Cholesterol(Protein, Liver, Kidneys, Pancreas)

Sick or Elderly Patients over 7 years of age: SHP- Cost $140
This test includes all of the above listed, as well as:
Electrolyte panel

I **ACCEPT** the recommended testing and authorize anesthesia to be administerd to my pet. I am aware of risks and complications that can arise from anesthesia.

X_____

I **DECLINE** the recommended testing at this time, and request to proceed with anesthesia understanding the risks and complications that can arise from anesthesia.

X_____

We also recommend an e-collar for your pet after surgery, this will prevent the animal from licking at the incision.

Please initial here if you would like a plastic ecollar (cone) placed on your pet ($23)_____

Please initial here if you would like a soft ecollar (donut-like) placed on your pet ($40) _____

It is the perfect time to consider permanent identification for your pet in case of an emergency. We offer Pet Link Microchipping which can be implanted while your pet is under sedation. Microchipping is an excellent tool to prove ownership and provides a resource for animal shelters to contact you in case your animal is separated from you. Cost $46.

Please initial here if you would like the microchip implanted_____

Has your pet been given any food or water after 6 pm last night? **Y** **N**
